## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakamoto et al. (5,191,697). Regarding claim 1, Sakamoto shows the use of a damper casing (fig. 6), metallic whiskers (2, 2C, and 2B), a woven damper pad (fig. 9), and corrugated sections (11) having peak and valley sections (fig. 5). The whiskers (2, 2C, 2B) intermittently penetrate through the damper casing between a first and second surface (fig. 9) and is held by a fastening string (4) – see col. 3 lines 66 to col. 4. line 3. Regarding claims 2 and 3, Sakamoto discloses a fixing binder (i.e., a thermosetting resin) applied to the entire damper, including the whisker and fastening string, which acts to hold the fastening string to the casing (1F). Regarding claims 4 and 6, the whisker of Sakamoto is held to both the peak and valley sections (since is woven into the warp and weft of the damper, then pressed into a corrugated form. Regarding claims 5 and 7, since the thermosetting resin is applied to the entire damper, the string (4) will be bound to *both* the peak and valley segments.

### ***Response to Arguments***

Applicant's arguments filed May 8, 2003 have been fully considered but they are not persuasive. As stated supra, the whisker (2C or 2B) of Sakamoto is woven into the damper and held by a fastening string (4). As can be seen in Sakamoto's figure 9, the whiskers are woven into the damper – the examiner considers this to “penetrate both surfaces” in the context as claimed and disclosed by the applicant. This can also be described by observing that the whisker of Sakamoto is visible from both surfaces, and yet hidden by both surfaces.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
